Ms. Kopatz-Olson  
Senior Engineering Recruiter Product Software  
111 McInnis Parkway San Rafael  
San Rafael, CA 94903

Dear Ms. Kopatz-Olson,

I came across the application for a software engineer intern at Autodesk. This position is interesting to me as someone who is certified in various Autodesk products, I would like to use my experience in computer science to improve the usability of Autodesk software. Autodesk's mission statement is to empower innovators with design and make technology so they can achieve new possibilities and that applies to me because I have a constant strive for innovation and creativity.

I believe that I would be a good fit for the company as a third-year computer science student because I have experience with React, MongoDB, ExpressJS, NodeJS, and JWT. These skills can be used to improve various Autodesk products including CAD, Inventor, and Revit. Because I am also certified in these Autodesk products, this will allow me to be a beneficial addition to your software development team.

As someone who has worked in a fast-paced environment before, I could see myself working in your company if given the opportunity to grow under your leadership and guidance. Attached is my resume and more of the projects that I have worked on including some of my certifications. Thank you so much for your consideration and I look forward to speaking with you soon!

Best Regards,

Kevin Zhou
